Source: World Bank calculations on poverty and poverty projections from PovcalNet database, the on-line tool for poverty measurement developed by the Development Research Group of the World Bank.

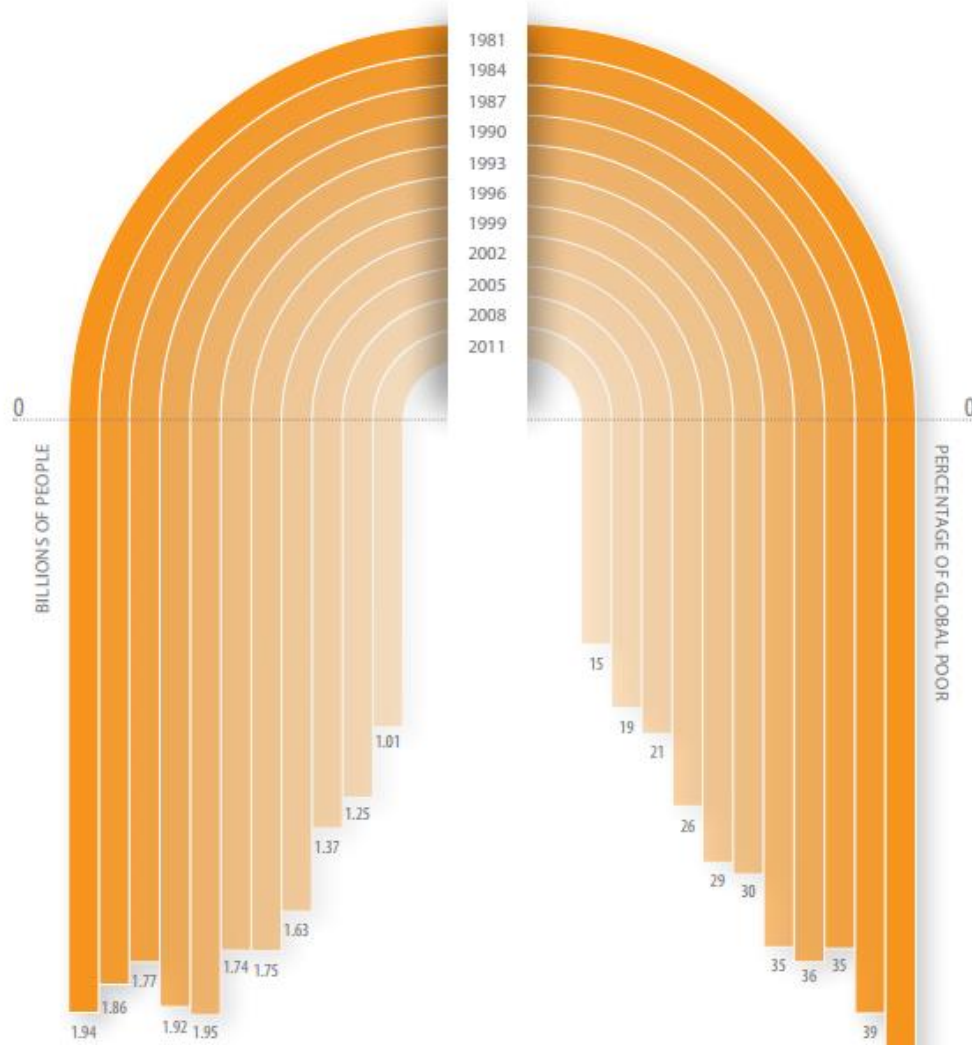

See <http://research.worldbank.org/PovcalNet/index.htm> for additional information and data. The source of growth projections used to generate the poverty projections for 2015, 2020, and 2030, is World Bank calculations (World Bank 2014a).

a. The statistic for 2030 is 0.11 for East Asia and Pacific. It has been rounded to 0.1 in the table.

b. The statistic for 2030 is 0.06 for Europe and Central Asia. It has been rounded to 0.1 in the table.

c. Refers to the numbers that are provisional because survey coverage is less than 50 percent of population in the region.

I dati della povertà nelle diverse regioni del mondo tempo per tempo e sulla base delle previsioni tendenziali. Non a torto si sostiene che tutto ciò sia la conseguenza della globalizzazione che sposta risorse, competenze e professionalità alla ricerca della allocazione ottimale e degli spazi di competizione aggredibili. È impressionante leggere che nell'East Asia e nel Pacifico, nel Sud dell'Asia e nell'Asia Centrale già nel 2015 si registrerà un calo decisivo con una tendenza all'azzeramento delle povertà nel 2030.

I poveri diminuiscono da un miliardo 940 milioni del 1981 a 1 miliardo circa del 2011 e diventeranno 835 nel 2015, 696 milioni nel 2020 , 411 milioni nel 2030. Rappresentano nel 2011 il 15% della popolazione contro il 39% del 1981.

Nella graduatoria della corruzione
